

Holding Company Website Blueprint v2

Prepared date: 2026-06-13

Prepared for: Diversified multi-sector holding company

1) Vision

Build a premium, listed-style corporate platform that presents one strong parent identity and multiple business divisions under a disciplined structure.

Positioning line:

Building long-term value across essential and growth industries.

2) Strategic Outcome

The website should function as:

- a trust layer for partners, investors, and institutional stakeholders,
- a sector navigation system for business discovery,
- a lead-routing engine for qualified enquiries,
- a scalable content platform for growth into countries, subsidiaries, and insights.

3) Recommended Stack

- Frontend: Astro
- CMS: Sanity
- Deployment: Cloudflare Pages or Vercel
- Forms: Serverless endpoint with anti-spam and routing rules
- Analytics: GA4 with event tracking

Why this stack:

- excellent Core Web Vitals,
- high SEO control,
- modular and scalable content architecture,
- editor-friendly without layout breakage.

4) Site Architecture

    D8 --> D9[Handover and support]
```

11) Delivery Timeline

```
gantt
    title Website Delivery Plan
    dateFormat YYYY-MM-DD
    section Phase 1 Foundation
    Discovery and IA :a1, 2026-06-20, 7d
    Wireframes and UI system :a2, after a1, 10d
    CMS modeling and build :a3, after a2, 12d
    SEO forms analytics compliance:a4, after a3, 6d
    QA launch handover :a5, after a4, 5d

    section Phase 2 Growth
    Insights and publishing scale :b1, after a5, 10d
    Regional pages :b2, after b1, 8d
    Emerging Ventures page :b3, after b2, 5d
```

12) Client Deliverables Pack

- Information architecture and sitemap.
- Responsive UI design system.
- Astro frontend implementation.
- Sanity CMS configuration and content model.
- Sector templates and reusable page modules.
- Contact routing with anti-spam.

- SEO foundation and page-level controls.
- Analytics and cookie consent integration.
- Legal pages setup.
- Editor guide and technical handover notes.

13) What the Client Receives at Launch

- Complete production-ready website.
- CMS admin access and editor roles.
- Reusable templates for future sectors and regions.
- Performance-tuned pages and SEO baseline.
- Routing-ready contact workflow.
- Documentation for content updates and governance.

14) Inputs Needed to Start Immediately

- Final company name and approved logo.
- Leadership bios and profile photos.
- Contact and office details.
- Legal text for privacy, terms, cookies.
- Preferred brand tone and typography direction.
- Approval of homepage and sector copy.

15) Final Recommendation

Proceed with Astro plus Sanity as the long-term digital foundation. This gives the strongest balance of speed, SEO, scalability, governance, and marketing readiness for a multi-sector holding company.
