

Prepared for: Multi-sector Holding Company (Australia base, multi-country growth)
Baseline strategy reference: First Pacific structural discipline (not design copying)

1) EXECUTIVE PROPOSAL

Recommended approach:

- Build a high-performance, corporate-grade website using a headless architecture.
- Use Astro for the presentation layer and Sanity as the content platform.
- Deploy via edge CDN for speed, reliability, and SEO performance.

Why this approach:

- Faster load speed and better Core Web Vitals than heavy traditional CMS installs.
- Strong content governance and easy edits for non-technical staff.
- Structured content model for sectors, markets, leadership, and insights.
- Scales cleanly for future subsidiaries, countries, and multilingual rollout.

Primary strategic outcome:

A listed-style digital foundation that supports credibility, partnerships, business development, and investor-grade communication across divisions.

2) WHAT THE CLIENT WILL RECEIVE

A. Strategy and UX

- Information architecture (parent-led and sector-led).
- Wireframes for all phase-1 pages.
- Content map and section-level page blueprints.

B. UI and Design System

- Corporate visual direction (color, typography, spacing, component logic).
- Reusable component library (hero, cards, governance blocks, insights lists, CT A modules).
- Responsive behavior rules for desktop, tablet, and mobile.

C. Website Build

- Frontend build (Astro) with reusable page sections.
- CMS implementation (Sanity) with content types and editor workflows.
- Sector templates and repeatable page models for expansion.

D. SEO and Performance

- Technical SEO foundation (metadata, canonical, sitemap, robots, schema basics).
- On-page SEO fields for each page and post.
- Performance optimization for Core Web Vitals and image delivery.

E. Lead and Contact Infrastructure

- Contact form with sector-based routing categories:
General Corporate, ICT, Property, Health/Wellness/Beauty,
AgriFood/Nutrition, Training & Development, Partnerships/Investment, Media/Other.

- Anti-spam protection and consent handling.
- Email routing rules and submission logging.

F. Compliance and Measurement

- Cookie consent banner and policy links.
- Privacy, Terms, Cookies, Corporate Information page setup.
- Analytics integration (GA4 and event tracking for key CTA actions).

G. Handover

- Admin guide for content editing.
- Publishing workflow guide for news/insights.
- Technical documentation and deployment notes.
- Post-launch support window (defined in contract).

3) PROPOSED STACK (NON-WORDPRESS)

Core stack:

- Frontend: Astro
- CMS: Sanity
- Hosting/CDN: Cloudflare Pages or Vercel
- Forms: Serverless/API endpoint + routing rules + anti-spam
- Analytics: GA4 + event schema

Why Astro over heavier alternatives:

- Ships less client-side JavaScript by default.
- Excellent static delivery for corporate content pages.
- Strong SEO control and predictable performance.

When to consider Next.js instead:

- If phase 2 requires heavy personalization, authenticated portals, or complex app-like behavior.

4) WEBSITE STRUCTURE (SITEMAP)

Main navigation:

- Home
- About Us
- Our Sectors
- Leadership & Governance
- Markets
- News / Insights
- Contact

Sectors (under Our Sectors):

- ICT Solutions
- Property Management
- Health, Wellness & Beauty
- AgriFood & Nutrition
- Training & Development
- Emerging Ventures (optional in phase 1, ready in model)

Footer links:

- About Us
- Our Sectors
- Leadership & Governance
- Markets
- News / Insights
- Contact

- Privacy Policy
- Terms of Use
- Cookies Policy
- Corporate Information

5) USER FLOW (HUMAN-READABLE)

A) Corporate discovery flow

1. Visitor lands on Home.
2. Understands parent company positioning and portfolio logic.
3. Chooses sector or corporate page.
4. Moves to relevant sector detail page.
5. Submits routed enquiry.

B) Partner / investor flow

1. Visitor reads About + Leadership & Governance.
2. Reviews Markets and portfolio logic.
3. Submits Partnerships/Investment contact route.
4. Internal team receives qualified enquiry by route.

C) Media / credibility flow

1. Visitor enters via News/Insights or search engine.
2. Reads thought leadership and sector relevance.
3. Navigates to sector page and Contact.

6) STRUCTURAL SCHEMA (CONTENT MODEL)

Entity: SiteSettings

- companyName
- tagline
- primaryContactEmail
- phone
- officeAddress
- socialLinks[]
- legalLinks[]
- analyticsConfig

Entity: Page

- title
- slug
- pageType (home/about/governance/markets/contact/legal)
- seoTitle
- seoDescription
- ogImage
- sections[] (modular blocks)

Entity: Sector

- name
- slug
- summary
- positioningLine
- overview
- coreAreas[]
- whyItMatters
- ctaLabel
- ctaRoute
- seoFields

Entity: LeadershipProfile

- fullName
- role
- biography
- photo
- displayOrder
- governanceTags[]

Entity: Market

- regionName
- status (active/strategic)
- summary
- displayOrder

Entity: InsightPost

- title
- slug
- category
- excerpt
- body
- publishDate
- author
- featuredImage
- seoFields

Entity: ContactRoutingRule

- enquiryType
- destinationEmail
- backupEmail
- autoResponseTemplate

7) URL STRATEGY (SEO-CLEAN)

- /
- /about
- /sectors
- /sectors/ict-solutions
- /sectors/property-management
- /sectors/health-wellness-beauty
- /sectors/agrifood-nutrition
- /sectors/training-development
- /sectors/emerging-ventures
- /leadership-governance
- /markets
- /insights
- /insights/{article-slug}
- /contact
- /privacy-policy
- /terms-of-use
- /cookies-policy
- /corporate-information

8) PHASED DELIVERY PLAN

Phase 1 (launch foundation)

- Home, About, Sectors, 5 core sector pages
- Leadership & Governance, Markets, Contact
- Legal pages

- CMS setup, SEO baseline, analytics, cookie consent, form routing

Phase 2 (growth)

- News / Insights expansion
- Emerging Ventures page
- Country/regional landing pages
- Downloadable company profile
- Optional multilingual readiness

9) QUALITY TARGETS (ACCEPTANCE)

Performance:

- Fast LCP and responsive UI on mobile + desktop.
- Optimized images and script minimization.

SEO:

- Correct heading structure and metadata per page.
- Sitemap and robots controls configured.
- Open Graph and basic structured data implemented.

Operations:

- Editors can update core sections without layout breakage.
- New sector or market can be added via CMS model without redesign.

Governance:

- Stable, restrained brand execution.
- Corporate tone consistency across all pages.

10) RISKS AND CONTROLS

Risk: Overly promotional copy weakens credibility.

Control: Editorial style guide and content approval workflow.

Risk: Page builder sprawl and technical debt.

Control: Component-driven sections with strict schema.

Risk: Form spam and low-quality leads.

Control: Anti-spam, validation, and route rules.

Risk: Slow pages due to unoptimized media.

Control: Automated image pipeline and performance budgets.

11) IMPLEMENTATION FLOW (PROJECT FLOW)

Step 1: Discovery

- Confirm brand, priorities, content owners, and conversion objectives.

Step 2: Information Architecture and Wireframes

- Finalize sitemap, page modules, and decision pathways.

Step 3: UI System

- Build visual language and reusable component rules.

Step 4: CMS Modeling

- Implement content types, validation, and editor flows.

Step 5: Frontend Build

- Build pages and templates from modular sections.

Step 6: SEO + Analytics + Forms

- Apply metadata, schema, tracking events, and lead routing.

Step 7: QA and Launch

- Responsive QA, accessibility checks, technical SEO checks, performance validation, deployment.

Step 8: Handover and Support

- Admin training, documentation, and stabilization.

12) OPTIONAL ENHANCEMENTS

- Interactive market footprint map.
- Leadership video snippets.
- Download center for profile brochures and governance docs.
- Regional language support model.
- CRM-native lead scoring integration.

13) CLIENT INPUTS REQUIRED TO START

- Final legal company name.
- Approved logo and brand assets.
- Leadership names, titles, bios, and photos.
- Contact details and routing mailboxes.
- Legal policy texts.
- Any preferred imagery direction.
- Approval on homepage and sector copy.

END OF PROPOSAL
